

## JinkoSolar to Provide 20.64 MWh Energy Storage System to Jinan Fenghui Tech Co., Ltd.

Jinko Solar the global leading solar and ESS company today announced it has signed a contract with Jinan Fenghui Tech Co Ltd for a 2 64 MWh utility scale and on grid liquid cooling energy storage system SunTera plus solar PV to be installed in Puritan Fujian province

The whole system consists of 6 sets of 3 44MWh Jinko Solar's flagship liquid cooling containerized utility scale ESS SunTera which integrates the company's core recirculating liquid cooling tech nology with other features including intelligent temperature control cluster level management insulation monitoring and five level safety protection each enabling data sharing on cloud plat form within the individual operating process en hancing stability and efficiency

One of the critical reasons that Jinko Solar's Suntera to be selected for this large capacity project is its better energy storage thermal management system that improves the safety of whole project

Energy storage fire accidents occur frequently around the world and the safety performance of energy storage needs to be upgraded urgently Temperature is a key factor in battery safety per formance and stability. The main manifestation is that high temperature will cause the internal materials of the battery to decompose release a large amount of combustible gas and heat and cause thermal runaway such as battery bulging rupture and aluminum foil melting thus inducing safety accidents.
