

JinkoSolar Ships 8 Units SunGiga ESS to Mideast

JinkoSolar will provide 8 units of its popular ESS product, SunGiga, with a rated capacity of 1.72MWh to Tadiran Energy Solution Ltd. in Mideast for peak shaving and various benefits.

The current major challenge in the development of battery storage systems lies in effectively managing the heat generated during the charging and discharging processes. Particularly in C&I scenarios, if the batteries are not operated at the appropriate temperature, it can lead to not only a decline in battery performance, a significant reduction in lifespan, and damage to battery
